## DAN MAHAVITHANA

### SENIOR FULL STACK DEVELOPER

An accomplished, self-motivated, creative, and hardworking individual with over 7 years of work experience as a Full Stack Software Engineer.

- Specialized in Object-Oriented Design and Analysis with extensive experience in full life cycle of the software design process including requirements definition, prototyping, proof of concept, interface implementation, testing and maintenance.
- Productive in both team-based and self-managed projects with excellent communication skills and having a commercial approach in problem-solving.
- Pursued higher studies in Computer Science at EIT in Napier, New Zealand and University of Peradeniya in Sri Lanka with a long-term career goal of becoming a Software Architect.

## < EMPLOYMENT HISTORY />

**August 2022 – Present (MONToux, WELLINGTON, NZ)**

### SENIOR SOFTWARE ENGINEER

(React , TypeScript, NodeJS, Python, Generative AI, AWS, Weaviate, LangChain, Terraform, Terragrunt Microsystems, Django, GraphQL, REST API, GIT , CI/CD, JEST, PYTEST, Bash,...)

*Montoux, a New Zealand-based SaaS startup, focuses on transforming actuarial modelling for life insurance companies, with a strong presence in the U.S. market. Its innovative platform empowers users to build, configure, and run large-scale actuarial models with ease. The technology stack includes a robust Python, Golang and NodeJS backend hosted on AWS, paired with a modern React and TypeScript frontend. Montoux's agile, collaborative teams emphasize iterative design and development cycles, ensuring the platform continuously evolves with valuable insights from both subject matter experts and end-users.*

*At Montoux:*

- Led the full stack development of a Gen AI product to solve actuarial science problems.
- Developed numerous API architectures and implementations which were catered for different use cases and requirements.
- Implemented a full authorization layer for primary GraphQL based API, utilizing AppSync, Cognito, Lambda, DynamoDB, Terraform and Terragrunt.
- Developed many solutions to support big data handling and visual representation of these data.
- Worked with product managers, tech leads and designers on setting the product directions, technical decision making and implementations
- Helped the team by running daily standups, retros and product showcases.
- Worked with Product owners and technical teams with backlog grooming and ticket creation.
- Was one of the only 2 lead engineers worked on the Support roster which always kept the product functioning 100% for customers and other Montoux staff.
- Mentored and managed Junior staff and help them to achieve their carrier goals.
